Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities:

Claim 2 (line 12) recites "the pin is pushed". It should recite --the stopper is pushed--.

For the purpose of examining the application, it is assumed that appropriate correction has been made.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Vance (US 4,522,421).

As to claim 2, Vance discloses a holding device comprising a first **12** and a second **40** object, the first object **12** having a pin having a free end section that projects into a hole formed in the second object **40**, a groove **46** in a wall of the hole extending along a transverse plane in relation to a longitudinal axis of the hole, a stopper **25** in the groove having a first section **A** (Figure 2 reprinted below with annotations) which projects into the groove and a second section **B** which projects away from the groove and into the hole, the groove having a cross-section that reduces in a direction away from the hole wall, wherein the first object includes an element **32,34,36** which may be

Art Unit: 3679

tightened axially towards the free end section of the pin, the pin and the element have mutually opposing edge areas, which areas are arranged to abut against the second section of the stopper when the element and the pin are drawn together to securely clamp the second section of the stopper between the element and the pin, and the edge areas are chamfered in such a manner that the stopper is pushed radially outwards as the pin and the element are drawn towards each other (Figures 1,2).

As to claim 3, Vance discloses a holding device wherein the first section **A** of the stopper **25** correspondingly compliments the cross-section of the groove **46** (Figure 1).

Response to Arguments

4. Applicant's arguments with respect to claims 2 and 3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. The limitations of the stopper "having a first section which projects into the groove and a second section which projects away from the groove and into the hole" wherein "the edge area are chamfered in such a manner that the --stopper-- is

Art Unit: 3679

pushed radially outwards as the pin and the element are drawn towards each other" in new claim 2 (lines 4-6, 11-33) necessitated the new ground of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
